Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest "a wavelength-selecting filter having a wavelength-selecting property of transmitting approximately all the light within the invisible range and a part of light within the visible range and reflecting another part of the light within the visible range, the wavelength-selecting filter being disposed on the second optical path between the wavelength-selecting mirror and the light -dividing member in an approximately conjugate position with the image-pickup surface of the second image-pickup element, wherein the visible fixation target light is guided to the eye and photo-received on the second image-pickup element" in combination with the remaining claim elements as set forth in claims 1-7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shibata is cited for its disclosure of providing a mirror 39 in a conjugate position in order to reflect the fixation target image to the image sensor 32.
